### **DETAILED ACTION**

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/1/08 has been entered.

#### **Examiner's comments**

2. It is highly recommended that applicant change the term "barrier" to "fuel barrier" wherever it appears in the claims. The examiner has construed "barrier" to mean "fuel barrier" in the past since applicant's problem is drawn to prevention of fuel permeation. Moreover, any plastic or metal layer can be construed as a barrier layer since they would prevent passage of liquids, rocks or any other large particle.

#### **Withdrawn Rejections**

3. All rejections of claims 28-43 only have been withdrawn.

#### **Rejections Repeated**

4. The 103 rejections of 7-17 maintained in the final rejection of 3/6/07, page 2, paragraph 2 is repeated for the reasons of record. Kleyon discloses wherein the barrier

Art Unit: 1794

member is exposed to the opening space, or the barrier member or layer is exposed to the opening space (since barriers 34, 36, or 18 from Fig. 2 are exposed to the open space).

### **New Rejections**

#### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 17-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Claims 17 and 28 recite the limitations "the opening space" and "the opening" in lines 10 and 7 respectively. There is insufficient antecedent basis for this limitation in the claim.

### **Answers to Applicant's arguments**

8. Applicant's arguments of 2/1/08 have been carefully considered but are deemed unpersuasive.

Applicant's arguments with regard to claim 28 are moot since the prior art rejections have been withdrawn.

Applicant has argued that gaskets 34 and 36 are not exposed to the opening space through the fuel container. However, applicant does not claim that the barrier

Art Unit: 1794

member is exposed to the opening space *through the fuel container*. Moreover, Kleyn discloses wherein the barrier member is exposed to the opening space, or the barrier member or layer is exposed to the opening space (since barriers 34, 36, or 18 from Fig. 2 are exposed to the open space).
